

BUILDING ON EXPERIENCE

living the future

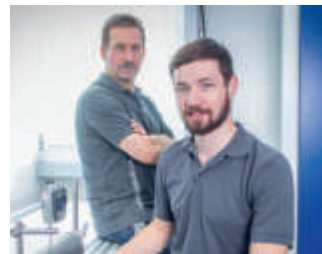

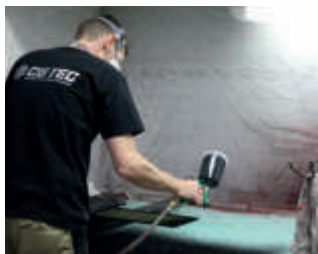

CG TEC Carbon und Glaserfasertechnik GmbH, a traditional family-run business, is meeting the challenges of a future-oriented technology with enthusiasm. But we never lose sight of essential human values here.

Oliver & Andrea Kipf

In our capacity as a system provider and a premium manufacturer, we set standards when it comes to the development and production of profiles made of carbon, basalt and glass fibres.

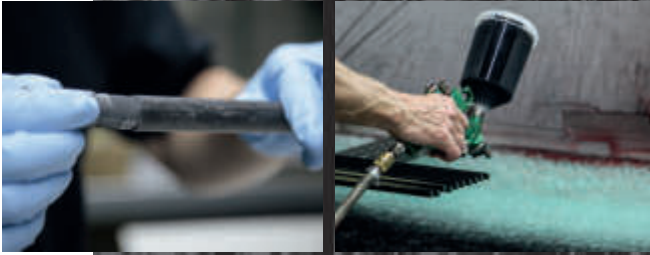

Implementing innovations

Anyone who believes he is really good stops improving: Developing innovative products, optimising processes and impressing people about the advantages of our materials – these are our passions. And the driving force behind new innovations.

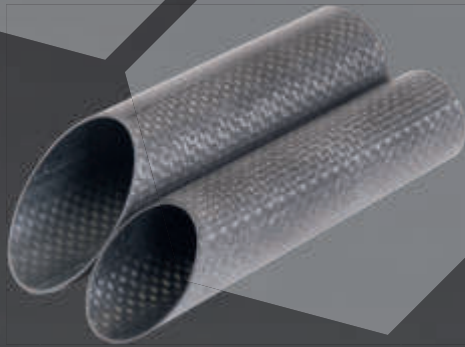

STRONG **partner by your side**

Extremely lightweight, durable and corrosion-resistant, but also flexible and unbreakable – the demands on modern fibre composites are rising continuously. CG TEC is part of this trend and supports customers from the initial idea and development through to production and final refinement.

CONNECTED RIGHT
from the start

Years of experience
In-depth know-how
Groundbreaking innovations
Boundless enthusiasm
Wide range of services

Pipes | CFK & GFK

Together with our customers, we develop pipes made of composites for nearly every specific application.

**FROM
SINGLE**

From the
development
the finished

Sheets | CFK, GFK & BFK

Whether processed in a special format or based on a drawing, our sheets are used in different industries.

Modules

We can supply complete modules in our capacity as a system provider: high-strength telescopic systems, ultralight composite milled parts, resistant cables.

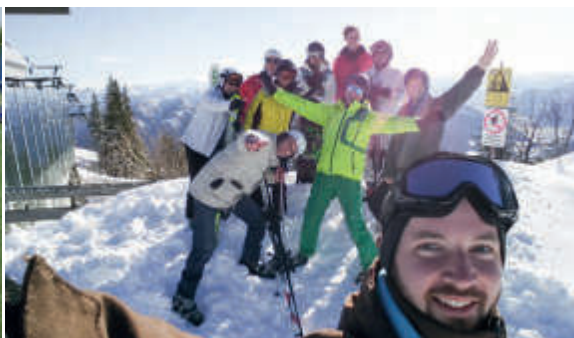

FROM A SOURCE

idea and
through to
component

Bars | CFK, GFK & BFK

CG TEC is the technology leader for round profiles made of carbon, glass fibres and basalt fibres. Both in Germany and throughout Europe.

TEAM SPIRIT **is the basis of our success**

People represent the most important part of our company. CG TEC is therefore highly committed to the job satisfaction and health of every individual. We want to provide our employees with ideal conditions to develop their potential and deliver top-quality work every day. This includes joint activities, an equitable work-life balance and individually agreed advanced training programmes.

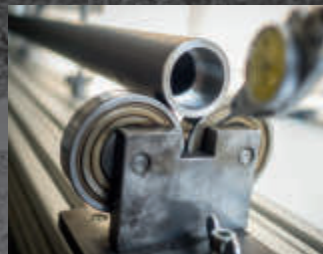

CARBON COMBINES

like no other material

The enormous innovative strength of fibre composites is what drives us. And has done so for more than 20 years.

TRADE TRAINING AT

CG TEC

Simply more of everything!

Start training with an event, receive bonuses for good examination results, individually increase strengths and tackle projects independently ...

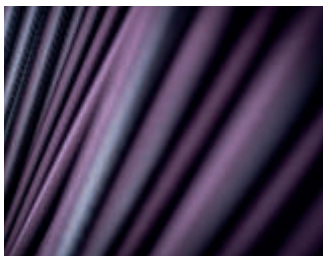

Sounds good?

Trainees at CG TEC receive all this and much more besides. . As a future-oriented company, we attach great importance to the promotion of young people.

Anyone who loves thinking outside the box and wants to start their career in a young, creative team will find training places for the following occupations at CG TEC:

- **Process mechanic for plastic and rubber technology (m/f)**
- **Machine and plant operator (m/f)**
- **Industrial management assistants (m/f)**

WORKING WITH A VIEW TO the future

Our strength lies in the wide range of services: from special one-off production through to series production we not only manufacture high-end products made of carbon, glass or basalt, but also implement integrated solutions for international customers and renowned manufacturers with top quality made in Germany.

Prepreg wrapping technology

Pultrusion technology

Sheet compression technology

Development and design

Module assembly

ENTER NEW DIMENSIONS with Carbonscout World

The store with the uniquely integrated composite technology path.

Here you will gain insights ranging from fibres and the production of fibre composite components through to finished products.

CG TEC is setting new standards with Carbonscout World – this combination of purchasing and experience is unique in the world. Experience composite products live: every Thursday from 10.00 to 17.00 or after making an appointment by phone.

Our Carbonscout World with the unique Composite Technological Approach is open for you every Thursday from 10.00 a.m. to 5.00 p.m.

AN OPEN ATMOSPHERE **provides room to breathe**

Success is not a matter of course, it must be earned. Whether a joint mountain hike, an informative workshop or strategic health management, here at CG TEC we strike a balance between performance and humanity.

Since we set store by solid values such as honesty, fairness and respect, we communicate openly with customers and partners. Whether with customers, partners or work colleagues, until a spark of enthusiasm for our materials has been lit. And beyond.
